

DANISH KHAN

FULL STACK DEVELOPER

7905955584 | khandanish30599@gmail.com | Gurgaon, India
LinkedIn: linkedin.com/in/danishkhan786/ | GitHub: github.com/Danishkhan79059

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of professional experience building scalable web applications using React.js, JavaScript, Node.js, Express.js, MongoDB, and PostgreSQL. Experienced in developing data visualization platforms, logistics and courier aggregation systems, RESTful APIs, third-party API integrations, and webhook-based workflows. Strong understanding of end-to-end application development, database management, API integration, debugging, and delivering production-ready solutions. Also experienced in exploring blockchain and decentralized identity solutions through hackathon projects.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, API Development, Webhooks

Databases: MongoDB, PostgreSQL, Prisma ORM

API & Integrations: REST API Integration, Third-Party API Integration, Courier API Integration, Webhooks

Logistics & Delivery: Courier Aggregation, Shipment Management, Order Management, Tracking APIs, Delhivery, Blue Dart, Ekart

Data & Visualization: Data Visualization, Dashboard Development, Excel/CSV Data Processing, Database Connectivity

Blockchain: Blockchain Fundamentals, Decentralized Identity, Digital Credentials, Web3 Concepts

Tools: Git, GitHub, Postman, VS Code

Other: Authentication & Authorization, API Testing, Error Handling, Debugging, Database Management, Responsive Web Development

PROFESSIONAL EXPERIENCE

Full Stack Developer

Vizlabs | Gurgaon, India | 2024 – Present

- Developed and maintained full-stack web applications using React.js, JavaScript, Node.js, Express.js, MongoDB, PostgreSQL, and Tailwind CSS.
- Built responsive and reusable frontend components using React.js and Tailwind CSS.
- Designed and developed scalable backend services and RESTful APIs using Node.js and Express.js.
- Worked with MongoDB and PostgreSQL for database design, data management, and application development.
- Integrated multiple third-party APIs and external services to support business-critical application workflows.
- Implemented webhook-based integrations for real-time order, shipment, and status synchronization.
- Developed and maintained applications across data visualization and logistics/courier aggregation domains.
- Worked on API authentication, validation, error handling, debugging, and third-party API integration issues.
- Collaborated with the development team to analyze requirements and deliver production-ready features.
- Contributed to end-to-end application development, from frontend UI and backend APIs to database integration and external service integrations.

PROJECTS

VIZTA – Data Visualization Platform

Role: Full Stack Developer | **Technologies:** React.js, JavaScript, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS

- Developed a data visualization platform that enables users to transform raw data into interactive dashboards and meaningful visual insights.
- Built responsive frontend interfaces and interactive dashboard components using React.js and Tailwind CSS.
- Developed backend APIs and application services using Node.js and Express.js.
- Implemented workflows for uploading and processing Excel and CSV files.
- Worked on database connectivity features that allow users to connect and retrieve data from databases.
- Developed data processing and transformation logic to convert raw datasets into visualization-ready data.

- Integrated frontend dashboards with backend APIs to provide dynamic and data-driven visualizations.
- Worked with MongoDB and PostgreSQL for application and data management.
- Contributed to the complete workflow from data upload/database connection → data processing → visualization → interactive dashboard.

SURESHIP – Logistics & Courier Aggregation Platform

Role: Full Stack Developer | **Technologies:** React.js, JavaScript, Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, Webhooks

- Developed features for a logistics and courier aggregation platform that enables businesses to manage orders and shipments through a centralized system.
- Built RESTful APIs for order management, shipment creation, courier assignment, tracking, and logistics workflows.
- Integrated multiple courier and delivery service providers, including Delhivery, Blue Dart, Ekart, and other courier partners.
- Developed courier aggregation workflows that allow users to select and assign suitable courier partners for shipments.
- Integrated third-party courier APIs for shipment creation, delivery services, and tracking updates.
- Implemented webhook-based integrations to receive and process real-time order and shipment status updates.
- Developed React.js interfaces for managing orders, shipments, courier selection, and tracking workflows.
- Worked with MongoDB and PostgreSQL to manage order, shipment, customer, and courier-related data.
- Implemented API validation, error handling, and debugging for third-party integrations and shipment workflows.
- Contributed to the end-to-end logistics workflow: order creation → shipment processing → courier assignment → tracking → delivery status updates.

HACKATHON EXPERIENCE

GDG x HackDays Hackathon – 2025

Role: Full Stack / Blockchain Developer

Decentralized Identity Platform

Technologies: Blockchain, Decentralized Identity (DID), React.js, JavaScript, Web3

- Participated in a GDG x HackDays Hackathon in 2025 and collaborated on building a decentralized identity platform using blockchain technology.
- Developed a platform concept that enables users to securely manage and control their digital identity and credentials.
- Worked on a decentralized approach for storing and verifying user credentials using blockchain technology.
- Contributed to a system where users can access and present verifiable digital credentials and identity-related information.
- Explored blockchain-based identity verification and decentralized credential management concepts.
- Worked on integrating the frontend application with blockchain-based functionality and decentralized identity workflows.

EDUCATION

Bachelor of Arts (B.A.) – Political Science

Purvanchal University, Jaunpur | 2022

ADDITIONAL INFORMATION

Professional Experience: 2+ Years | **Current Role:** Full Stack Developer | **Location:** Gurgaon, India | **Availability:** Open to Full Stack Developer Opportunities
